

Feedlot Starter Pack

Description

Feedlot starter pack is a ready to mix combination of Acid Buf, a highly effective rumen buffer and Sucram, a high intensity sweetener specifically formulated for starter feedlot diets.

Key Features

- Acid Buf maintains rumen pH between 5.8 - 6.2 (Rumen optimal pH level).
- Contains Calcium (30%), Magnesium (5.5%) and other minerals.
- The molecular structure of Acid Buf allows more acid absorption than regular rumen buffers.
- Sucram is produced using ISO-Fusion technology and this technology ensures a homogeneous mix throughout a ton of final feed.
- Sucram is approximately 540 times sweeter than sugar, has a sugar like, clean long lasting sweet taste with excellent mouth feel.

Key Benefits

- Feedlot Starter Pack will have an excellent acid absorbency with long term buffering ability.
- Feedlot Starter Pack will enhance feed palatability.
- Stimulates feed intake and masks bitter or unpalatable tastes associated with high levels of medications and minerals that may be present in the diet.

Target feeds and inclusion rates

Feedlot Starter Pack is packed in 5 kg individual units. Each unit consists of 4.8kg Acid Buf and 200 g Sucram. Bag size: 4 units.

Target Feeds	Inclusion rates
Sheep Feedlot starter diet	1 unit/ton
Beef Feedlot starter diet	1 unit/ton
