

Pigortek Milky Fruit

Flavouring Palatants for Piglets

Description

Pigortek Flavouring palatant, Milky Fruit is specifically formulated to increase the taste characteristics and have a strong and distinctive aromatic profile when introduced into animal feeds.

Features

- Attractive Milky Fruit taste characteristics with a strong, distinctive aromatic profile.
- Manufactured in accordance with ISO Fusion Technology ensuring:
 - ⇒ homogeneous distribution and flow-ability.
 - ⇒ micro-encapsulated → stability, uniformity and analytical traceability.
 - ⇒ Thermally protected by a retention agent.
- Quantitative traceability by high pressure liquid chromatography (HPLC).
- Compliant with EU regulations, free of GMO and animal products and carries FAMI-QS certificate of analysis.
- Registration numbers in accordance with Act 36 of 1947:
 - ⇒ **Pigortek Milky Fruit - V 20864**

Benefits

- Mask bitter tastes associated with high levels of medications and minerals.
- Enhance feed palatability and stimulates feed intake.
- More uniform feed intake, improving performance.
- Accuracy of dosing for consistent quality and performance. Each batch of feed manufactured will therefore be constant in its degree of taste and aromatic profile.
- Permits feed formulation changes without affecting intake patterns.
- Traditional flavours on average exhibit a 25% loss after pelleting. Pigortek flavouring palatants do not.
- Pigortek flavouring palatants show a greater stability and low volatility of flavour in feed when compared to traditional flavours.

Applications

Target Feeds	Inclusion rates
Complete Piglet diets	150-500g/ton

Please note that application rates are very much dependent upon raw materials used in feed formulations.
