

Description

Profeed is a prebiotic, made up of natural short chain Fructo-oligosaccharide feed ingredient (scFOS) which nourish beneficial microflora in the digestive tract.

Features

- Prebiotic, selectively nourishing beneficial microflora (Lactobacilli, Bifidobacteria) in the colon and caecum.
- A natural soluble fibre derived from sugar beet.
- Made up of 1 glucose molecule, bound to fructose molecules.
- Profeed has a constant and guaranteed composition.
- Sweet powder: 30% sucrose.
- Used in Human Food - food grade version - **ACTILIGHT**.
- Guaranteed stability to heat treatment.
- Registration numbers in accordance with Act 36 of 1947:
⇒ **Profeed – V 17516**

Benefits

- Aids in the colonisation of the GIT with beneficial bacteria.
- Inhibit the development of pathogenic bacteria.
- Profeed modulates the intestine's mucosal immune system (villi length, crypt depth and better lactogen immunity).
- Increases production of volatile fatty acids (VFA) and lactation in dogs and decreases putrefying substances and biogenic amines in feces in cats and dogs alike.
- Reduction in post weaning diarrhea in piglets and calves, improved feed assimilation, improvement of ADG and FCR.
- Helps maintain hindgut pH of horses and prevents accumulation of acetate, following diet changes.
- Reduction in the risk of colic in horses.

Applications

Greatest response obtained by Profeed is in young animals aiding in the development of the Gastro Intestinal tract.

Target Feeds	Recommendations
Companion animals	
• Adult maintenance	4kg/ton
• Puppy	5kg/ton
• Performance, Lite, Senior	5 kg/ton
Piglet diets	1.5-2.5kg/ton
Rabbits	2.5-3kg/ton
Chick diets	0.6-1.5kg/ton
Calf diets	5g/head/day
Horse diets	10–20g/head/day
