

Description

Sucram is a unique patented high intensity sweetener and taste enhancer developed for use in a wide variety of animal feeds.

Features

- Sucram is an intimate combination of high intensity sweeteners (saccharin), potentiators and enhancers.
- Approximately 540 times sweeter than sugar.
- Sugar like; clean long lasting sweet taste with excellent mouth feel. No lingering bitter or metallic after tastes.
- Manufactured in accordance with ISO Fusion Technology ensuring:
 - ⇒ homogeneous distribution and flow-ability
 - ⇒ micro-encapsulated → stability, uniformity and analytical traceable
 - ⇒ Thermally protected by a retention agent
- 100% soluble in water, making it ideal for adding to water and liquid applications.
- Low inclusion rates per ton of final feed.
- Compliant with EU regulations, free of GMO and animal products and carries FAMI-QS certificate of analysis.
- Registration numbers in accordance with Act 36 of 1947:
 - ⇒ **Sucram - V 20863**

Benefits

- Enhances feed palatability and stimulates feed intake particularly with young animals and during stress periods.
- Mask bitter/unpalatable tastes associated with high levels of medications and minerals.
- Versatile, can be used into wide variety of animal feeds especially in starter diets.
- More uniform feed intake, improving performance.
- Permits feed formulation changes without affecting intake patterns.
- New research indicated that Sucram stimulates glucose, sodium and water absorption in the lower digestive tract in both monogastric and ruminant animals.

Applications

Target Feeds	Inclusion rates
Piglet, growing and sow diets	150 – 200g/ton
Feedlot starter diets	200g/ton
Calf starter diets	200g/ton
