

Description

MOLASWEET is a **multi – sensory palatant** with a well balanced combination of high intensity sweetener and molasses flavour to reconstitute the taste, smell and sweetening power of high quality cane molasses.

Features

- Confers a similar sweet taste and cane molasses flavour to the feed containing no or small amounts of molasses.
- Manufactured in accordance with ISO Fusion Technology ensuring:
 - ⇒ homogeneous distribution and flow-ability
 - ⇒ micro-encapsulated → stability, uniformity and analytical traceable
 - ⇒ Thermally protected by a retention agent
- Quantitative traceability by high pressure liquid chromatography (HPLC).
- Compliant with EU regulations, free of GMO and animal products and carries FAMI-QS certificate of analysis.
- Registration number in accordance with Act 36 of 1947:
 - ⇒ **Molasweet – V 20855**

Benefits

- Enhances feed palatability and stimulates feed intake, improving ADG.
- Masks bitter/unpalatable tastes associated with high levels of medications and minerals.
- Overcome the important sensorial variations of molasses of different origins.
- Very easy to store, handle and incorporate into any feed.
- Ensure a regular intake when variation in raw materials or change in formulation occurs.
- Low inclusion rate replace some cane molasses, creating more space for other nutrients in high density diets.
- New research indicated that Molasweet stimulates glucose, sodium and water absorption in the lower digestive tract in both monogastric and ruminant animals.

Applications

Complete feeds	150-200 g/ton
Complementary feeds	200-300g/ton
