

Pan-Tek Lacto-Vanilla

Description

Pan-Tek Lacto-Vanilla flavouring palatant are specifically formulated to increase the taste characteristics and have a strong and distinctive aromatic profile when introduced into animal feeds

Features

- Attractive Lacto-Vanilla taste characteristics with a strong distinctive aromatic profile.
- Manufactured in accordance with ISO Fusion Technology ensuring:
 - ⇒ homogeneous distribution and flow-ability
 - ⇒ micro-encapsulated → stability, uniformity and analytical traceability
 - ⇒ thermally protected by a retention agent
- Quantitative traceability by high pressure liquid chromatography (HPLC).
- Compliant with EU regulations, free of GMO and animal products and carries FAMI-QS certificate of analysis.
- Registration numbers in accordance with Act 36 of 1947:
 - ⇒ **Pan-Tek Lacto-Vanilla - V 23979**

Benefits

- Mask bitter tastes associated with high levels of medications and minerals.
- Enhances feed palatability and stimulates feed intake, especially in pre-wean diets for piglets and calves.
- More uniform feed intake, improving performance.
- Accuracy of dosing for consistent quality and performance. Every batch of feed manufactured will therefore be constant in its degree of taste and aromatic profile.
- Permits feed formulation changes without affecting intake patterns.
- Very limited loss after the pelleting process.

Applications

Target Feeds	Inclusion rates
Complete piglet / calf diets	150-500g/ton

Please note that application rates are very much dependent upon raw materials used in feed formulations.
