

## Description

Stalosan is a disinfectant and desiccant powder making it a unique sanitising agent for all animal housing.

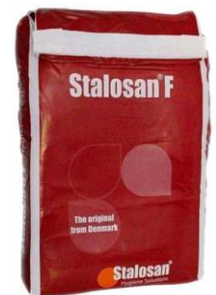

## Features

- **Stalosan F** is a broad spectrum dry disinfectant, effective against bacteria, viruses, fungi, coccidial oocytes, fly larvae and roundworm eggs.
- **Stalosan F** is a proficient desiccant which effectively controls moisture, reduces ammonia, hydrogen sulphide and other noxious gases.
- **Stalosan F** is approved by the Environmental Protection agency, a division of the FDA (Registration number: 75613-1) and SABS approved.
- **Stalosan F** can be used in the presence of animals, even day old chicks.
- **Stalosan F** is a fine pink inert mineral compound, does not contain chemicals.
- **Stalosan F** is safe to man, animals and the environment.
- **Stalosan F** does not have a corrosive effect on equipment despite its low pH value.
- **Stalosan F** has a huge amount of data available on all aspects of the product.
- **Stalosan F** has complete technical and marketing dossiers.
- **Registered at NRCS: Act29GN R529/236028/040/403**

## Benefits

- Stalosan F creates optimal sanitary conditions in animal housing and has a longterm residual effect.
- Stalosan F is not inactivated when it comes into contact with organic material such as ground floors or bedding material.
- Stalosan F can be used in the presence of animals.
- Stalosan F does not become inactive once it dries out.
- Stalosan F has a long term broad spectrum effect.
- Stalosan F has an effective control against

Bacteria	Viruses	Ammonia
Fungi	Parasites	Moisture

## Applications

- ⇒ Requires treatment once a day for 3 days, thereafter once per week.
- ⇒ Simply sprinkle 50 g per m<sup>2</sup> of floor space.
- ⇒ Can be done by hand or sieve.
- ⇒ Can also use spreaders or powder blowers.
- ⇒ Can be used in footbaths replacing liquid disinfectants.
- ⇒ Can be used for disinfection of houses, mills, silo's, augers, transport vehicles and feed tanks.
