

Description

Garlium® GEM HC consist of concentrated Garlic and other *Allium* compounds and were specifically formulated to enhance the flavour and taste of animal feed. Garlium GEM® HC also acts as an insect repelling agent when consumed by horse, cattle and antelope.

Features

- Pleasant garlic taste characteristics and a strong, distinctive aromatic profile
- Contains concentrated Garlic and other *Allium* compounds
- Homogeneous particle size improves mixability into feeds, licks, etc
- Stable for 12 months if stored according to manufacturer's specifications
- Compliant with EU regulations, free of animal products
- Registration numbers in accordance with Act 36 of 1947:
⇒ **Garlium® GEM HC - V 27580**

Benefits

- In horse, cattle and antelope diets, it aids in repelling insects
- Once ingested, non-metabolized garlic active ingredients are excreted via the breath and skin, surrounding the animal with a garlic aroma
- New research indicates that Garlium® GEM HC consumed by cattle and game, reduces the number of ticks attached to the skin, especially in the ear area
- *Do not feed Garlium® GEM HC to lactating animals where milk intended for consumption by humans or sold for processing*

Applications

Target animals	Inclusion rates of Garlium® GEM HC
